Lock Buying Guide

How to order and Frequently asked Questions

Locking Products

All lockable products RMF-Group sells come with locks and 2 keys. Different products will not automatically be keyed alike, but if an item has multiple locks the locks on that item will be keyed alike- for example the PL207 wardrobe ships with a cabinet and pedestal lock, keyed alike.

Laminate Locks

There are two types of laminate locks:
locks for a pedestal (drawers) and locks for cabinet (doors).

Metal Storage Locks

All metal files use the same style lock.
To remove lock core you must order 8000CORREVKEY

How to Order

Are you ordering more than 1 item?

- ↳ **NO** - your product will arrive with a lock and set of keys, no need to order additional locks.
- ↳ **YES** - do you need your items to be keyed alike?
 - ↳ **NO** - your products will arrive keyed separately, no need to order additional locks.
 - ↳ **YES** - you will need to order additional locks in order to key alike.

How to Key Alike

PL Laminate: Determine how many lock cores you need. You will be ordering lock core kits.

PO should read: PLLOCKCORE (x qty needed), "KEY ALIKE"

Metal Storage: Determine how many lock cores you need. 8000CORREVKEY required to remove core and key alike.

PO should read: 8000CORREVKEY qty 1, 8000LOCKCOREKIT (x qty needed), "KEY ALIKE"

Frequently Asked Questions

Can I order a replacement key for lock core number X?

RMF-Group does not sell individual replacement keys. The best solution is to purchase a new lock core or complete lock.

I have lost my key! I am locked out, help!

The best option is to order a Master Key and replacement lock core. This will allow you to open the lock out and replace with a new secure lock core and set.

My pedestal is locked and I must urgently open, emergency help!

If you must open your drawer and do not have a master key you can drill out the core. You can then replace the damaged lock with a complete lock kit assembly or lock core.

I have a lock core change key but can not unlock my drawer?

8000CORREVKEY and PL core removal key will not unlock your item. To open you will need the original key or a master key.

PL cabinet lock cores can be removed when the door is locked, but this will not allow you to open the door, you will still need a master key.
